

Henderson® SNOWFOE® RSP FLEX

REVERSIBLE SNOW PLOW

Henderson puts your snow and ice control program in the fast lane

Henderson's RSP Flex takes flexible moldboards to a new level. Capable of being a large open face push plow, a funneled one-way plow (flex right or left) or even a tight curled reversible snow plow for improved visibility in dry powdery snow conditions. Whatever the mission calls for, the RSP Flex is ready to respond.

Reversible snow plows tend to exert severe hinge pinching forces at the swivel point. Henderson delivers a design that is up to 300% stronger than similar plows in the market. Couple this with our torsion spring trip edge, curb guards, heavy-duty flexing arms, full width top tube, heavy-duty steel mounting frame, spherical bearing connection points and you have the ultimate in flexible snow plows.

SPECIFICATIONS

STANDARD FEATURES

- Dual Spherical Bearing Connections
- Dual Flexing Arms: 3/8" HR Plate with 2-Axis Pivoting Mount
- Dual Flexing Cylinders: 3-1/2" dia., 6-1/4" stroke and 2" dia. Nitrited Rod
- Poly Moldboard: 3/8" Thick UHMW
- Dual Curb Guards
- Main Push Beam: 4" x 4" x 3/8" Wall
- Three attack angle adjustment positions (5°, 15° or 20°) to meet all snow and ice removal conditions.

ADJUSTABLE CUTTING EDGE TRIP

- Five 3/4" square torsion springs.
- Zero insertion force for SAFE and easy spring replacement.
- Each spring features individual three-position trip tension adjustment, wrench included.
