

# STREET SMART™

KEEPING AHEAD OF THE CUTTING EDGE™

MODEL MF MULTI-SECTION  
REVERSIBLE SNOWPLOW

The Street Smart™ plow is a multi-section, shock absorbing, reversible snowplow. Each section functions independently to enhance snow removal operation for all types of conditions. Designed for added safety to protect plow, hitch, truck and operator. Adapts to all types of hitches.

Model	Length	Cutting Width at 32°	Height	Moldboard Thickness	Return Springs	Weight
MF3.4	10'6"	8'11"	41"	10 ga.	4	2650 lbs.
MF5.4	11'9"	10'0"	44"	10 ga.	4	2900 lbs.

When the "Street Smart™" plow hits an obstacle, the flexible shock rail absorbs the impact and springs back slightly. At the same time, the entire plow section turns upward and slides over the obstacle. Immediately upon passing the obstacle, the cutting edge moves back into clearing position and the return spring pushes the raised section back down against the street.
