# Configure Your System:

- Step 1: Select Capacity (Gallons) Debris Tank Volume  
 Step 2: Select Output/Blower capacity (CFM)  
 Step 3: Select Capacity Water tank(s) -100 or 200 or 400 Gal.

Debris Tank Volume:	Output/Blower Capacity:	Water Tank:	Features:	Mounting Options:	Example
(US Gallons)					Pacific-Tek Model #:
PV350	Gas Standard Output = D1 (525 CFM)	100 gallons = W	Standard:	Skid = "S"	PV350-D1-W-S
PV500	Gas High Output = "H0" (825 CFM)	200 gallons = W200	Optional:	Trailer = "T"	PV500-DHO-W200B-T
PV800	Diesel High Output = "DHO" (825 CFM)	400 gallons = W400	Traffic Cone Holder	Telescoping Boom ("B")	PV800-DHO-WB-T
PV1200		(All water tanks have an air gap)	Sight Glass (Blister)	Pedestal Telescoping Boom ("BP")	PV1200-DHO-W400-B-T
			Powder Coated	Reverse Flow	
			Hydraulic Hatch Door	Flood Lights	
			3-stage Filtration System	Tool Box	
			Anti-Freeze	Traffic Director	

## POWER VAC OPTIONS

PV800-DHO-WB-T

Options: Traffic Director, Tool Box, Reverse Flow, Flood Lights

Power Vacs at work  
(potholing)

PV500-DHO-WB-T

Option: Flood Lights

## Applications:

- Dewatering holes/pits/vaults
- Debris/mud removal
- Potholing
- Keyholing
- Street repair
- Slot trenching
- Clean up after emergency rehabilitation
- Cleaning valve cans & vaults
- Suck up HDD drilling mud
- Industrial machine cleaning
- Storm drain cleanout
- Mulch and gravel removal
- Salt and sand removal
- Soil and wastewater removal

PV500-DHO-W-S
