

**Henderson®**  
**BLACKBELT® MAXX**  
ALL-SEASON MULTI-PURPOSE BODY

***Advanced Anti-icing, Deicing and Material Hauling Capabilities***

# BLACKBELT<sup>TM</sup> MAXX

## ALL-SEASON MULTI-PURPOSE BODY

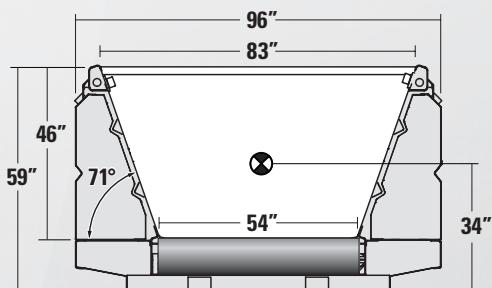

In a class all its own, Henderson has poured decades of manufacturing expertise and work truck technology into this phenomenal all-season multi-purpose body: the **BlackBelt Maxx**. With its optional TGS style tailgate spreader, this machine is ready for both winter weather duty and large capacity material handling.

The **BlackBelt Maxx**'s capabilities include advanced anti-ice applications, deicing applications, pre-wet applications, salt slurry generation, material hauling and high volume material conveying, perfect for feeding asphalt pavers or for shoulder- ing projects. When it comes to material hauling, the **BlackBelt Maxx** stands alone. The unit easily handles salt, sand, gravel, medium sized rock, rip-rap, asphalt, snow, leaves, dirt, mulch, ash and much more.

LENGTH	CAPACITY (cu. yd.)	INSIDE WIDTH/ OVERALL WIDTH	CAPACITY (gal.)	RECOMMENDED CA/CT*
11'	8.45	83"/96"	330	96" CA
12'	9.25	83"/96"	385	108" CA
13'	10.05	83"/96"	440	96" CT
14'	10.85	83"/96"	495	108" CT
15'	11.65	83"/96"	550	120" CT
16'	12.45	83"/96"	605	132" CT
17'	13.25	83"/96"	660	144" CT

\*CA/CT measurements listed above assume zero interference behind the cab.

Dimensions assume 41" dia. tires, 52" tandem tirespacing and 24" paving distance.

### PROFILE/LOW CENTER OF GRAVITY

No hoist, stable load handling and always avoids overhead obstacles (power lines, tree limbs, etc.).

### STEEP 71° SLOPED SIDE WALLS

Majority of load rests on the floor, not the side walls. This reduces unnecessary wear and tear on side walls and prevents material from sticking.

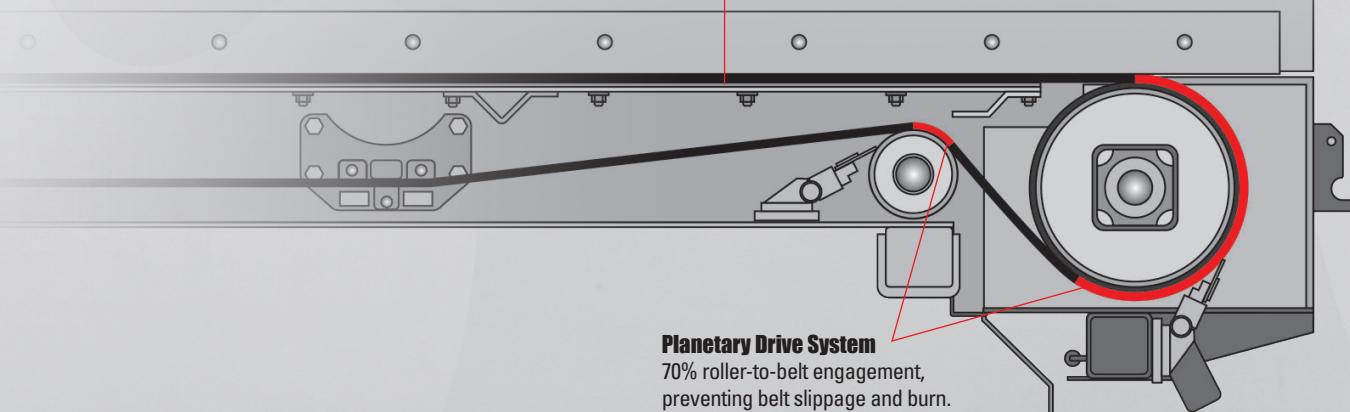

### 54" WIDE PURE BELT

No chain maintenance, no belt deterioration and always delivers a consistent material flow.

### FLOOR

The floor is 1/4" AR 400 sheet over a steel frame for impact resistance. For improved belt performance, the AR 400 is covered with a heat-resistant UHMW liner.

### Planetary Drive System

70% roller-to-belt engagement, preventing belt slippage and burn.

### LIQUID CAPABILITIES

11' BODY LENGTH 330 GAL. MAX

17' BODY LENGTH 660 GAL. MAX

### ANTI-ICE SLURRY PRE-WET GRANULAR

### STANDARD CONTROLS

B-Maxx<sup>TM</sup> Command shown in cab (arrow). Controller for snow & ice applications sold separately.

### DUAL LIQUID TANKS OPTIONAL

Dual 165 to 330 gal. liquid tanks are optional for anti-ice, pre-wet and salt slurry applications.

### PATENTED BELT TENSIONING SYSTEM

Tightens or loosens belt to match load capacity. No pressure on belt when not in use-for longer belt life.

**ENCLOSED HYDRAULICS & CONTROLS**

### B-MAXX™ COMMAND

#### Belt & Tailgate Standard Control Panel

Easy-to-use controller mounts in cab or inside the body cabinet.

Controls the belt (forward/reverse), tailgate (up/down) and auger (both directions).

*Note: the TGS auger/spreader function is handled by the separate spreader control unit (sold separately).*

REDUNDANT LARGER ROCKER SWITCHES FOR DURABILITY AND EASE OF USE

CONVEYOR ACCELERATE / DECELERATE SPEED CONTROL

*The Blackbelt Maxx can handle a serious load - like this Class E rip rap!*

#### High Capacity Hopper

Its 46" high side walls and 54" wide belt combine to hold 8.45 to 13.25 cu. yd. of material.

#### High Volume Output

Moves entire load at once with unload speeds faster and safer than traditional dump trucks.

#### Controlled Load Management

Deliver a partial load or the entire load, exactly where needed. Unload fast or slow-or anywhere in between.

*The Blackbelt Maxx feeds a paving machine like a pro! 71" sides are self-cleaning.*

#### OPTIONS

- Removeable TGS-Tailgate Spreader System
- Direct Cast® Precision Spinner
- Berm Chute
- Anti-ice Spray Bar
- Liquid Tanks
- Handheld Wireless Remote
- 30-gallon Hydraulic Reservoir
- Ladder
- 8" Board Pockets
- Tarp
- Toolbox
- Cab Shield
- Valve enclosure

REMOVABLE TGS ATTACHMENT

DIRECT CAST®

BERM CHUTE

SPRAY BAR
