Why use hose reels?

Why use hose reels? Because they make hose handling more efficient and safer. Your hoses, cables and cords will last up to five times longer. You will improve hose management, which decreases labor costs. Your chances of injuries from tripping

hazards will decrease, which saves lost work time, medical bills and higher insurance. You also save the expense and time to replace expensive hoses, cables and cords that get run over by fork lifts and other vehicles.

Five reasons why hose reels add value

Improve efficiency

Hoses, cable and cords are where you want/need them.

Increase safety

Reduce tripping accidents and lost work time.

Minimize leakages

Reduce costs of air and water leakages.

Reduce hose wear

Hose and cord on reels can last up to five times longer.

Increase productivity

No more tangled hoses improves efficiency.

OSHA says reduce your trips and falls

"There are many situations that may cause slips, trips and falls. The controls needed to prevent these hazards are usually obvious, but too often ignored, such as... coiling up extension cords, lines and hoses when not in use and keeping electrical and

other wires out of the way." OSHA's "Fall Prevention Tips" include, "Practice good housekeeping. Keep cords, welding leads and air hoses out of walkways or adjacent work areas."

Special Powder Coat Paint Colors

Special Powder Coat Paint Colors

Customize your reel color with special paint options

Reelcraft is most well-known for its bright red reels, but we also paint secondary colors and special order colors. Reelcraft uses a rigorous cleaning process on raw parts prior to paint. After this process is complete, parts are then coated with a high quality, durable polyester powder coat paint for a uniform, corrosion resistant finish that will last through years of service.

RT625-OLP-40BL

Reelcraft frequently paints secondary colors - white, black, blue and gray. There is no set-up charge for secondary colors, only a variable per unit charge. We thoroughly clean our booths and tools prior to painting special order colors therefore require a one-time set-up charge in addition to the variable per unit charge.

Static Discharge / Grounding Reels Series G 3000

Static discharge reels are used to ground equipment operating in hazardous atmospheres. When properly clamped to ground, the static discharge reel dissipates static electrical buildup, reducing the chances of sparking and the potential for explosion.

General Use Hand Crank Hose Reels | Series C

Light Industrial Hand Crank Hose Reels

Reelcraft's Series C hose reels are designed for lighter-duty applications that require longer lengths of hose. The Series C incorporates a balanced brass swivel, brass inlet, lighter weight components and forward-thinking design. Reels in this family benefit from a tough, corrosion-resistant powder coat paint. All reels feature a drag break to prevent de-spooling when reel is not in use.

Series CU Air/Water - 3/8", 1/2" I.D.

Series CU features our most rigid base design in this series and supports the reel on either side.

Series CT Air/Water/Pressure Wash - 3/8", 1/2" I.D.

The Series CT frame features a tubular design. The inlet is fed through the center of the tube frame, protecting the inlet hose and creating a cleaner look over all.

Series CM Pressure Wash - 3/8" I.D.

Series CM reels offer the greatest amount of flexibility in this series by featuring a modular mounting platform. Reelcraft can configure custom mounts upon request or the customer may choose to supply their own.

Reelcraft's Reel Configurator

Large Frame Reels - Series 1200, 2400, 3900 & 3700

1/2" to 2" I.D.; hose lengths to 610' and more

Reelcraft's new reel configurator quickly and accurately quotes large frame reels. Simply answer a few questions about your reel needs and the configurator can instantly quote your reel. It will also create a 3D model from which a sales drawing and bill of material can be generated that can be sent out for your review. The new configurator allows for shorter lead times for large frame reels and increases the accuracy of the available combinations of reel options.

Improved response time

The configurator has greatly improved our response time to the customer. The traditional 2-3 day quote time has been reduced to only 20 minutes.

More accurate quotes

The configurator's rules based system eliminates incompatibilities and increases the accuracy of the available combinations of reel options. It will also create a 3D model from which a sales drawing and bill of material can be generated that can be sent out for your review.

Reduced product lead time

The improved response time and quote procedure have also decreased the product lead time. The standard 4-6 week product lead time can be reduced to a mere 2-3 weeks with most configured products.

Current capacity

The configurator currently covers 85% of the standard large frame reels sold and manufactured by Reelcraft with hose I.D.'s ranging from 1/2" to 2". More sizes will become available as released.

For an accurate quote, please advise:

1. Product to be handled such as air, oil, water, etc.
2. Maximum operating pressure in PSI.
3. Hose inside diameter (I.D.) and length.
4. Desired drive type such as hand crank, electric motor, air motor, etc.
5. Any special or additional accessories needed.

NOTE: Not all options are available in every combination. All large frame reels are supplied without hose. Reelcraft's configured reels and custom reels are built to order and not returnable.

High Capacity Cable Reels

Nordic Series CR2400/CR3100

for 3-conductor service

Series CR2400 - Direct crank rewind or chain and sprocket drive powered by A.C. or D.C. electric motor or compressed air motor. An adjustable spring drag device is used to brake the reel.

Series CR3100 - Powered by a rugged spring protected by a tamperproof housing, a ratchet mechanism locks on payout of cable, but is easily disengaged with a pull to provide rewind.

Cable rollers: Series CR3100 models supplied with a 4-way roller guide assembly. Roller guide supplied with Series CR2400 models at extra cost. Roller position must be specified. If not specified, bottom wind will be supplied. Can be supplied or installed, consult manufacturer.

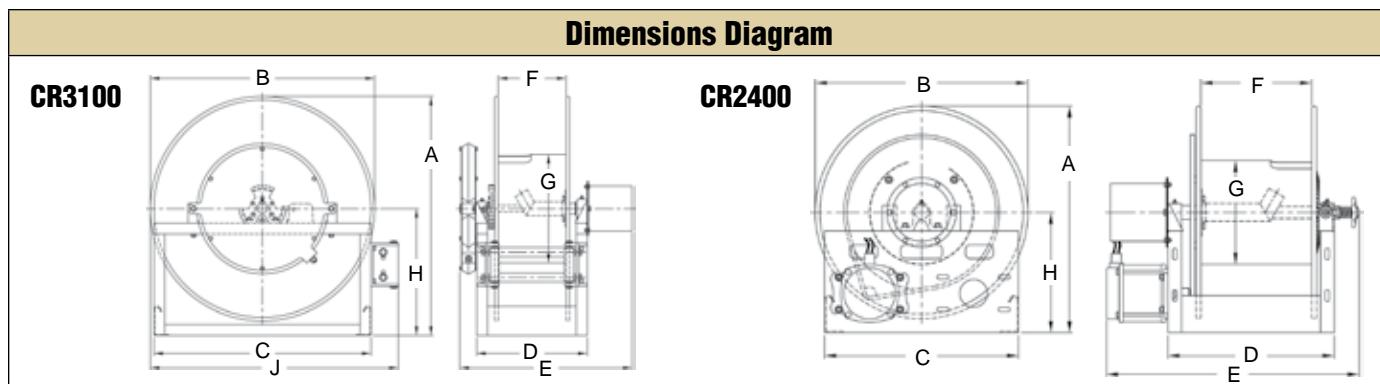

Note: A cable stop should be used to prevent damage to rollers and to permit adjustment of free cable length.

Heavy Duty Cord Reels | Series 30000

Heavy Duty Cord and Cable Storage Reels

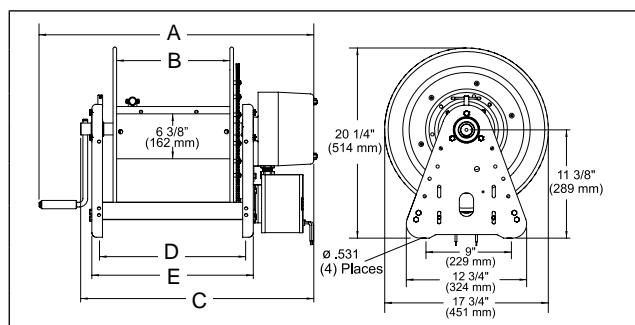

Hand Crank, Bevel Crank & Motor Driven

Keep long lengths of expensive electrical cord off the ground and out of harm's way with Reelcraft's expanded Series 30000 line, which includes cable storage reels and live power cord. The reels are designed to handle long lengths of 10/3, 12/3 and 16/3 cable.

Reelcraft's Series 30000 storage reels and live power cord reels are constructed of heavy gauge steel and are assembled with vibration-proof, self-locking fasteners to ensure assembly integrity. They undergo a five-stage cleaning process and are individually powder-coated for the highest quality, corrosion-resistant paint adhesion. Suited for indoor, non weather-tight applications only.

Cord/Cable Storage Reels

Cord and cable storage reels are used for storage, unwinding, and winding of conductive cord/cable. The reel is not intended to be live and the power source must be disconnected while reeling/de-reeling to avoid twisting the wires. Series 30000 cable storage reels are available in hand crank only.

Adjustable Hose Bumpers

Adjustable hose bumpers are solid molded rubber assuring a long life and nonslip grip. Hose bumpers allow the desired length of hose to be permanently stored outside the reel. Hose bumpers are included on the reels purchased with hose. Reels purchased without hose do not include the hose bumper.
