## How to Compute Pounds of Crack Filler Needed:

\*Note: Sealant weight per gallon varies between manufacturer, and between product types. Consult your distributor for details.

**EXAMPLE**: How many pounds of Super Stretch sealant are needed to fill 10,000 linear ft. of crack 3/8" wide X 3/4" deep, and having a Band-Aid of 2" wide X 1/16" thick? (Super Stretch weighs 8.0 pounds/gallon.)
